Hello and Welcome!

This guide is for you if you are a pickleball player who is determined to get better—fast.

It can be confusing to know exactly what level you're at and where to begin to improve your game.

In this guide, you will:

- ▶ First, use my trademarked “Ratings Finder” to easily determine your current skill level.
(No more wondering how you compare or what tournament division to enter...)
- ▶ Then, get level-specific guidance on what aspects of placement and positioning to focus on to move up to the next level.
(Goodbye “But, Where Do I Begin?” conundrum...)
- ▶ Finally, you'll establish a consistency goal, customized for your skill level, to help you target the number of shots you can hit in a row while keeping the ball in play. *(No more wondering how long you should be able to hang in there...)*

Part 1:

DETERMINE YOUR SKILL LEVEL

On the following page, you'll find a simple "yes or no" path to help you assess or confirm your current skill level on a national standard. Knowing your skill level will help you identify what to focus on next in order to improve your game. It will also help you determine what division to enter if you decide to play in a tournament.

Part 2:

HOW TO GET TO THE NEXT LEVEL

With my coaching clients, I zero in on the their mistakes and tell them exactly what to focus on to get to the next level.

Obviously, in this guide, I can only offer some general, level-specific advice for improving *your* game.

Read the notes below, review your answers to the previous section, then skip ahead to the correct page for your skill level.

#1: FOCUS ON THE “NO’S”

Take note of what phrases you answered “no” to from the previous questions. Start practicing those skills/strategies.

#2: FOCUS ON PLACEMENT & POSITIONING

Without doubt, the fastest and easiest way to get better results is to improve your placement and positioning.

You don’t have to be faster, stronger or younger if you are in the right position, choose the right shot, and hit to the right spot.

Below you’ll discover my specific recommendations for how to improve your placement and positioning, no matter what level you’re at.

#3: FOCUS ON CONSISTENCY

In pickleball, the team that makes the least unforced errors will usually win the game. That's why it's so important to reduce your unforced errors and just keep the ball in play.

In case you aren't familiar with the term, an "unforced error" is when you end the rally by hitting the ball out of bounds or into the net... *(Not that you have EVER done either of those things, right?...wink, wink...)*

For each skill level, I'll give you a consistency goal to help you set reasonable expectations and targets for reducing your unforced errors during a match.

NOW WHAT?

There you'll find a simple list of what to focus on to improve your placement & positioning as well as a target consistency goal.

DIVE IN

Congratulations! It sounds like you're just getting into pickleball. As you may know, it's an extremely fun sport—even if the scoring system is a little tricky at first. One of the best things about it is that patience and finesse are more important than being young, strong or fast (although those are all helpful, too!).

TO MOVE TO THE NEXT LEVEL

- ▶ Study the Basic Rules & Starting Positions
- ▶ Develop Your Hand-Eye Coordination
- ▶ Watch the Ball As it Hits Your Paddle

Consistency Goal: Try to hit 3 shots in a row without making an unforced error.

ON YOUR WAY

Great, you're not brand new to the game anymore! You've pretty much got the rules down, you know a little basic strategy and you're trying to implement it.

TO MOVE TO THE NEXT LEVEL

Elevate your game by focusing on:

- ▶ What Position to Be in *During* the Point
- ▶ When to Hit the Ball Shallow or Deep
- ▶ Strengthening Your Backhand (or Weaker Side)

Consistency Goal: Try to hit 6 shots in a row without making an unforced error.

Consistency Goal: Try to hit 10 shots in a row without making an unforced error.

INTERMEDIATE

GETTING SERIOUS

Way to go! You're already better than the majority of players in the US. You've got the potential to get a lot better, and it isn't speed or brawn that will get you there. It's patience, & finesse, placement & positioning.

TO MOVE TO THE NEXT LEVEL

If you want to take your game to the next level as quickly as possible, here's what to focus on:

- ▶ Advanced Strategies to Work as a Team & Cover the Court
- ▶ *When to Use Which Shots (& Why)*
- ▶ How to Perfect Your Ready Position Before & Between Shots

Consistency Goal: Try to hit 20 shots in a row without making an unforced error.

- ▶ Fine-Tune Your Positioning to Stay on the Offensive & Get Back to It Quickly
